CH2M HILL Taps Fran DeLozier For Global Nuclear Services Role

RICHLAND, Wash.- Fran DeLozier, president and general manager of CH2M HILL Hanford Group, Inc., has been named senior operations vice president of CH2M HILL's Nuclear Systems and Services Business Unit with a key role in helping the global project delivery firm expand its work in nuclear operations.

DeLozier was president of CH2M HILL Hanford Group when it was purchased from Lockheed Martin two years ago and led the company as it made outstanding accomplishments as the Department of Energy's Hanford Tank Farms contractor. These achievements included removing all Hanford tanks from a congressionally mandated watch list, reinstating a pumping program that has removed more than 1.3 million gallons of liquid waste from Hanford's aging single-shell tanks, and completing the infrastructure for Hanford's planned waste treatment plant \$9 million under budget and a year ahead of schedule.

In her new role, DeLozier will be deputy to Robert Iotti, senior vice president of the CH2M HILL Energy, Environment & Systems Business Group and director of the Nuclear Systems and Services Business Unit. She will be responsible for technical coordination of all CH2M HILL nuclear business. Her responsibilities will include directing the implementation of operations procedures and systems and providing technical and business expertise as CH2M HILL becomes a full service provider to the government and commercial nuclear industry.

DeLozier's promotion to the global corporate unit is immediate. Edward Aromi, CH2M HILL Hanford Group executive vice president and chief operating officer, has been named acting president while CH2M HILL selects a permanent successor to head the company. In the interim, Iotti, who is one of the CH2M HILL Hanford Group board members, will be working out of a Hanford office to assist with the transition.

"CH2M HILL is a global company, and one of the keys to our success is sharing the talents of our people as they are needed. We realized we needed Fran in this new role several months ago because of her extensive experience and record of leadership and have been working since then to make it happen. She has demonstrated the leadership and experience that we need to help us expand our sphere of nuclear operations globally," said CH2M HILL Chairman and Chief Executive Officer Ralph Peterson.

"While I will miss working directly with all the exceptional people who make up CH2M HILL Hanford Group, I accept this new position with a sense of challenge as our employee-owned company continues to expand its reputation as one of the world's greatest engineering firms," DeLozier said.

CH2M HILL, Ltd. is an employee-owned engineering, construction, operations and major projects delivery company that serves clients on six continents in the nuclear, telecommunications, environmental, energy and power, water, transportation and high technology industrials infrastructure businesses.
